

Profile

Data-driven Computer Science undergraduate with strong foundations in **data analysis**, **machine learning**, and **statistical modeling**. Experienced in working with real-world datasets using **Python**, **Pandas**, **NumPy**, and **Scikit-learn** to extract insights and build predictive models. Skilled in **data cleaning**, **feature engineering**, and **data visualization**. Familiar with deploying data applications using **Streamlit**. Seeking opportunities in **Data Science / Data Analytics** roles.

Education

● Nitte Meenakshi Institute of Technology, Bengaluru	June 2022 – June 2026
B.E. in Computer Science and Engineering	
● Central Academy Sector 1, Prayagraj	2021 – 2022
12th Grade	91%
● Central Academy, Prayagraj	2019 – 2020
10th Grade	88%

Technical Skills

Programming: Python, SQL, Java
Data Science Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
Machine Learning: Classification, Regression, Model Evaluation
Data Analysis: Data Cleaning, EDA, Feature Engineering
Visualization: Matplotlib, Seaborn, Streamlit Dashboards
Tools: Git, GitHub, Jupyter Notebook, VS Code
Databases: MySQL, PostgreSQL, MongoDB
Concepts: Statistics, Probability, DBMS

Relevant Coursework

Machine Learning, Data Mining, Statistics, Probability, Database Management Systems, Data Structures

Projects

● EduVest – Investment Analytics and Forecasting Platform	Mar 2026
– Developed a data-driven investment analysis platform using Python and Streamlit .	
– Collected and processed real-time stock data using yFinance API .	
– Performed time-series analysis and basic forecasting for profit prediction.	
– Built dashboards for portfolio performance visualization .	
● Smart Parking Occupancy Prediction System	Apr 2026
– Built a machine learning model to predict parking occupancy using historical data.	
– Performed data preprocessing , feature engineering, and model training.	
– Implemented predictive analytics for next-hour occupancy forecasting.	
– Visualized trends and revenue insights using dashboards.	
● Fake News Detection using Machine Learning	Nov 2024
– Built a classification model using TF-IDF and Logistic Regression .	
– Performed text preprocessing and feature extraction.	
– Evaluated model using accuracy, precision, and recall metrics.	
– Deployed using Streamlit .	

Experience

● Data Analysis Intern – Diabetes Dataset	Mar–Apr 2024
Aqmenz Pvt Ltd	
– Performed exploratory data analysis (EDA) using Pandas and NumPy .	
– Built machine learning models for diabetes prediction.	
– Applied preprocessing techniques including missing value handling and scaling.	
– Identified key factors influencing diabetes risk.
